

## Modi Pure RO - 25

### FEATURES

1. Compact Institutional RO System with automatic flushing.
2. It uses Reverse Osmosis-The World's most modern water treatment technology.
3. Five stage water purification process with high rejection RO membranes.
4. Consists of 1 No. of booster Pump & 3 Nos. of RO membranes.
5. Institutional System for Organisational size of 20 to 50 persons.
6. Capacity : 20 to 25 Liters per hour.
7. Duty Cycle : 150 Liters per day.
8. Dimensions : 410 (W) x 320 (D) x 610 (H)

## Modi Pure RO - 50

### FEATURES

1. Institutional RO System with automatic flushing.
2. It uses Reverse Osmosis-The World's most modern water treatment technology.
3. Five stage water purification process with high rejection RO membranes.
4. Consists of 2 No. of Booster Pumps & 5 Nos. of RO membranes.
5. Institutional System for Organisational size of 25 to 100 persons.
6. Capacity : 40 to 50 Liters per hour.
7. Duty Cycle : 300 Liters per day.
8. Dimensions : 490 (W) x 330 (D) x 840 (H)

## Modi Pure RO - 100

### FEATURES

1. Automatic system with 100 Liters storage tank & magnetic level controller.
2. It uses Reverse Osmosis-The World's most modern water treatment technology.
3. Five stage water purification process with high rejection RO membranes.
4. Consists of 1 No. of Pressure Pump & 1 Nos. of Feed Water Pump.
5. Consists of 1 No. of RO Membranes.
6. Inbuilt dosing system to enhance the life of RO Membranes.
7. Institutional System for Organisational size of 50 to 200 persons.
8. Capacity : 80 to 100 Liters per hour.
9. Duty Cycle : 500 Liters per day.
10. Dimensions : 610 (W) x 508 (D) x 1200 (H)

**LARGEST RANGE OF WATER PURIFIERS**

## Modi Pure Galaxy +

### FEATURES

1. Wall Mounted & Counter Top.
2. RO + UV + TDS Level Display.
3. Water Level Indicator Strip.
4. Food Grade Plastic Body.
5. Water Flow : 12 Liters Per Hour.
6. Fully Automatic Operation - Auto On & Auto Off.
7. Storage Tank Capacity - 10 Liters

## Modi Pure Smart +

### FEATURES

1. Product is made of Food safe, non-toxic engineering plastics.
2. Four stage purification based on U. V. technology.
3. Retains natural quality of water.
4. A unique EMS to monitor the purification process.
5. Solenoid Valve for regulation of water flow.
6. Feather Touch Switch to ensure smooth & shock proof operation.
7. Wide working voltage range for protection against fluctuations.
8. Modi Pure Smart with U. V. Boiling.

## Modi Pure Flora +

### FEATURES

1. Five stage water purifier based on Reverse Osmosis, the most effective purification system.
2. Automatic Water Level Controller.
3. Storage Tank Capacity - 7 Liters.
4. Hard saline water & even borewell water is processed to best quality of drinking water.
5. Does not use any chemical to treat the water.
6. Water flow rate 10 Liters per hour.

## Modi Pure 100 Lph-UV

### FEATURES

1. Four stage water purification based on UV Technology.
2. Retains natural quality of water.
3. Stainless Steel Skid.
4. Institutional System for Organisational size of 50 to 200 persons.
5. Capacity : 80 to 100 Liters per hour.
6. Duty Cycle : 600 Liters per day.
7. Dimensions : 400 (W) x 300 (D) x 450 (H)

## Modi Pure Wave +

### FEATURES

1. Suitable for under the counter.
2. Can be connected to Water Coolers.
3. Can be connected to Refrigerators with Water Dispenser.
4. Equipped with Hydrostatic Tank.
5. Water Flow - 10 to 12 Liters per hour.
6. Storage Tank Capacity - 7 Liters.

## Modi Pure RO - 15

### FEATURES

1. Compact Institutional RO System.
2. It uses Reverse Osmosis-The World's most modern water treatment technology.
3. Five stage water purification process with high rejection RO membranes.
4. Consists of 1 No. of booster Pump & 2 Nos. of RO membranes.
5. Institutional System for Organisational size of 10 to 30 persons.
6. Capacity : 15 to 18 Liters per hour.
7. Duty Cycle : 90 Liters per day.
8. Dimensions : 400 (W) x 300 (D) x 450 (H)
